Phase 2 End Project.
Simply registration and login JSP Spring project.

Uses JPA repositories, Rest Controllers, JSP Servlets, and spring framework as a basis of the web application. To run: open file with pom and run SpringLoginApplication.java.

Sprint 1: Conceptualization
             Figured out what frameworks and methodologies I would be using to complete the project along with.

Sprint 2(main sprint): Implementation of framework and algorithms,

Sprint 3: Testing and bug-fixing.
